FOR IMMEDIATE RELEASE

SeQent Releases v.9.0 of its Market Leading Real-Time Decision Support (RTDS) Platform

London, Ontario – January 17, 2011 – SeQent (www.SeQent.com), the leading provider of innovative real-time Automated Messaging, Visual Display Management and Wireless Kanban solutions announced that v.9.0 has successfully moved through the BETA testing phase and is now a production release.

"V9.0 is a major release for SeQent that has been in development for the past 2 years. The development of V9 was significantly defined by input from some of our largest customers. We are very excited to make V9.0 available to all of our clients. In addition, with the economy starting to show signs of recovery and companies starting to reinvest in lean manufacturing tools, SeQent is well positioned with our overall tool set." says Scott Burns, CTO of SeQent.

Some of the major improvements to the platform include:

- Major new features
- Updates to most existing products/features
- Complete re-write of *First*PAGE Server & *First*PAGE Alarm Manager & Marquee Manager
- Numerous new gateways (General Electric CIMPLICITY, HP Operations Manager)
- Greatly reduced resource consumption
- Greatly improved throughput
- Greatly improved scalability
- All products re-branded to SeQent
- Microsoft 2008 support (64 bit)

About SeQent

SeQent is a leading provider of hardware and software solutions that accelerate the decision making process enabling companies to improve plant productivity and quality increasing plant floor visibility and ultimately profitability. The SeQent Real-Time Decision Support (RTDS) solution is a transformational and modular based technology platform. This solution utilizes a logic/rules based engine that manages the lifecycle of an alarm and/or event, ensuring the incident has been resolved. The Automated Messaging, Visual Display Management and Wireless Kanban modules send alarm and event information to mobile phones, pagers, PDA's, LED & LCD displays, sounder devices, stack lights as well as Motorola TEAM VoWLAN smartphones and MOTOTRBO two-way radios.

In support of their Continuous Improvement initiatives SeQent's solutions are utilized by some of the world's largest manufacturers including: Abbott Nutrition, Chrysler, Ford Motor Company, General Motors, Georgia Pacific, Honda, Intel, Kellogg's, SC Johnson, Toyota and WS Packaging. The company is privately held and is headquartered in London, Ontario. For more information visit: www.SeQent.com or e-mail: sales@seqent.com.
